#### Central Alberta Theatre

# Position Description

# **Lighting Designer**

## The Lighting Designer's Role

The lighting designer for CAT's Studio Theatre productions will be in charge of creating a stage lighting design that makes the actors and their settings visible to the audience, and whenever possible/practical evokes the appropriate mood, indicates the time of day and location, and reinforces the style of the production. The lighting designer will also normally participate in the hanging and setting of the lights and will train the lighting techs in operating the light board if needed.

### Reporting

The lighting designer takes direction from the director of each production and from the Production Manager as appropriate and as detailed in this document.

#### **Etiquette**

Theatre volunteers commit to behavioral etiquette throughout their time with the production in order to show respect to the Stage Manager, the Production Manager, the play, the actors, the audience, and CAT:

#### Overall

- I shall look upon the production as a collective effort demanding my utmost cooperation. Hence, I will forgo the gratification of ego for the demands of the play
- I will <u>always</u> treat everyone who is a part of the production with respect and dignity (i.e. the actors, Stage Manager, Director, Production Manager, Vice President – Productions, designers, technicians, etc.)
- I will not mistreat, direct or put unnecessary strain on my fellow volunteers because it can lead to miscommunication, hurt feelings, tension, broken trust and anxiety. I do not want this to happen
- I will not arrive for my volunteer work under the influence of any drugs or substances for this will automatically remove me from the production

### During Tech Week

- I shall accept the Stage Manager's, the Production Manager's and the Vice President – Production's direction in the spirit in which it is given for they see the production as a whole and my role as a portion thereof. The Production Manager and the Vice President - Productions have the authority to direct minor set design changes/alterations if there are safety issues.
- I will respect crew members/actors that are focusing on the needs of the production (i.e. avoid interrupting actors if they are rehearsing lines, stay out of the way of working crew members that are setting up furniture and/or props, etc.)

#### **Duties**

#### On-going

- Become familiar with the written board-approved policies and procedures as they relate to CAT productions and follow them
- Share the vision and mission of CAT

# Preparation Before Tech Week

- Obtain a copy of the script from the director as early as possible after the play has been approved by the Board and read it through at least once
- Find out from the Vice President Productions or the Production Manager the performance, move-in and tech week dates of the play
- Attend the first production meeting, scheduled by the Production Manager in conjunction with the director and the stage manager, at which the director will share their artistic concept with the Vice President Marketing & Communications and the production team: the Stage Manager, the Lighting Designer, the Sound Designer, the Set Designer, the Set Decorator, the construction head, the painting head, head of costumes, head of props. This meeting will take place before or immediately after the auditions for each play. Be prepared to ask questions of the director about their intent for the lighting, special effects, etc., or if you have a lot of detailed questions, work with the director to schedule a follow-up meeting early in the rehearsal process

- Work with the rest of the design team (set, costume and sound designers)
   to ensure a unified look and feel for the production
- Attend rehearsals to get a feel for the lighting cues and to plan how to light the actors as they move from place to place on the stage, and be available to meet with the director to discuss the lighting design
- Create the lighting plot
- Finalize the design on paper/computer in order to be ready to input the
  design into the lighting board as soon as possible after the lights are hung
  and set, and the lighting board is hooked up, and prior to the cue-to-cue
  rehearsal

#### Tech Week

To facilitate planning and preparation, there will be a predictable tech week routine, in as much as is possible, for each Studio Theatre production. The routine, while flexible, will focus on the importance of keeping the overall volunteer experience as positive and enjoyable as possible.

- Load-in of the set, the lights, the sound equipment, the main set pieces and the putting up of the set, lights and sound equipment will be the priority as soon as the production is given access to the performance space as booked. The lighting designer will normally assist the Operations & Technical Manager or designated staff with the hanging and setting of the lights for a production.
- On the day of the cue-to-cue rehearsal but prior to the start of the cue-to-cue the lighting designer will input the basics of their design into the light board. This will be done alongside the director, who might involve the actors as well. The director will have final say on the light design at this point.
- The lighting designer will have his/her design and equipment finalized in time for the scheduled cue-to-cue rehearsal. A small portion of that rehearsal may be used to make minor alterations to these designs, at the request of the director and with the permission of the Production Manager. This is so that volunteer time will not be wasted at this valuable technical rehearsal, and the show can be run at least once from one cue

to another in a reasonable amount of time. The lighting designer, in conjunction with the Stage Manager of each production, will create the lighting cue sheet. The lighting designer will also train the lighting techs on operating the light board during this time.

 A dry tech rehearsal (no actors) will be held immediately after the cue-tocue rehearsal when needed or whenever possible so that backstage crew and tech crew can practice the technical aspects of the production. The lighting designer will use that time for additional training of the lighting techs if needed.

The schedule for tech week will be largely dictated by the timing of the access to the space.

A typical schedule for a five-day tech week could be:

Saturday: load in and assemble stage, set, all equipment, set lights Sunday: AM: finalize light design with director (& cast at director's

discretion)

PM: Cue-to-Cue rehearsal (cast & full production crew) then

dry tech if time/needed

Mon: Tech Run, with lights and sound (costumes, makeup optional)

Tues: Dress Run, costumes and makeup, lights and sound Wed: dark (or second dress, at the discretion of the director)

Thurs: Preview (full show, CAT members as audience)

Fri: Opening Night

However, sometime we operate with a condensed tech schedule that starts on the Sunday prior to Thursday's preview.

A typical schedule for a condensed tech week could be:

Sunday: load in and assemble stage, set, remaining equipment (lights

will be hung during the days of the week prior), set lights, finalize light design with director (& cast at director's

discretion)

Monday: Cue-to-Cue rehearsal (cast & full production crew)

Mon: Tech Run, with lights and sound (costumes, makeup optional)

Tues: Dress Run, costumes and makeup, lights and sound Wed: dark (or second dress, at the discretion of the director)

Thurs: Preview (full show, CAT members as audience)

Fri: Opening Night

Tech week will be supervised by the Production Manager or the Vice President Productions.

The lighting designer will ordinarily not attend the full dress rehearsals except under extraordinary circumstances and at the request of the Production Manager.

### Post Production

- Participate in a post-production evaluation process, set up by the VP of Productions as soon as possible after the show closes, for all production heads to contribute information/feedback on what production elements went well and what improvements could be made
- After the post-production meeting, the routine of subsequent shows will be adjusted if necessary by the Production Manager to incorporate any changes needed to optimize the volunteer experience and the presentation of CAT Studio Theatre shows.
